PROJECTS

1. PORTFOLIO WITH 3D MODELS AND STUNNING ANIMATIONS

- Designed captivating 3D models using Blender.
- Utilized React with the React Three Fiber library to embed and control the 3D models.
- Added impressive animations to the projects using GSAP.

- Link: [Insert portfolio link]

2. ONLINE ROCK SCISSORS PAPER GAME WITH STUNNING ANIMATIONS

- Created an engaging Rock Scissors Paper game using ReactJS and Redux for state management.
- Incorporated Framer Motion to add delightful animations and enhance the user experience.
- Developed an online version of the game using Firebase's real-time database feature.
- Link: <https://online-rock-paper-scissors-game.vercel.app/>

3. DRAG & DROP TO-DO LIST APPLICATION

- Built a feature-rich to-do list application with drag and drop functionality, including a stylish dark mode.
- Utilized React as the main framework and integrated the DnD library for smooth drag and drop interactions.
- Added captivating animations using Framer Motion.
- Link: <https://todo-list-app-with-dark-mode-drag-and-drop-functionality.vercel.app/>

4. COUNTRY EXPLORER WEBSITE UTILIZING APIS

- Developed a comprehensive website featuring information about every country in the world.
- Utilized React Router DOM and Axios to fetch data from APIs and provide seamless navigation.
- Created an intuitive user interface for exploring different countries and their details.
- Link: <https://rest-countries-api-with-color-theme-switcher-jade.vercel.app/>

5. ANIMATED COMING SOON SECTION

- Crafted an attention-grabbing "Coming Soon" section using React and Framer Motion.
- Incorporated captivating animations to create a visually appealing and interactive experience.
